

# Plugin Catalog

## Plugin Catalog

The Traefik Plugin Catalog is a centralized marketplace where community members can share their own custom middleware solutions for the Traefik Proxy. By leveraging this catalog, you can easily discover, install, and configure third-party plugins to enhance or extend Traefik's core features. These plugins are created and maintained by the community, which means a wide variety of innovative solutions are available to address different needs.

Explore the full list of plugins at [plugins.traefik.io/plugins](https://plugins.traefik.io/plugins) and consider contributing your own solutions or providing feedback on existing ones. Whether you're looking for specialized middleware or simply want to see what's possible, the Plugin Catalog is an invaluable resource for any Traefik user.
